

QUALITY POLICY

Flubetech, S.L. is dedicated to the development, production, and commercialization of specialized coatings based on advanced vapor-phase deposition technologies. These technologies offer innovative solutions to the current challenges of the industry, prioritizing respect for the environment as one of the fundamental pillars of its activity.

Flubetech, S.L. is a benchmark in innovation in sectors such as automotive, aeronautics, biomedicine, and component manufacturing, providing specific solutions tailored to the needs of each client.

Managing quality means managing customer satisfaction and improving personalized attention. For this reason, we are committed to the continuous training of a team with high technical capabilities that provides our clients with solutions tailored to their needs. The entire team, without exception, is responsible for ensuring the quality of our products and services.

The company relies on a Quality Management System focused on continuous improvement. This system allows us to promote the continuous improvement of the efficiency of our operations, minimize risks, and foster a healthy and collaborative work environment that contributes to a positive work climate.

The differentiating elements of Flubetech, S.L. are the innovative application of advanced coatings, a philosophy of continuous technological innovation, a strong commitment to excellence in the quality of our services, and compliance with legal and regulatory requirements, as well as the specific needs of our clients.

Currently, we have a management team firmly committed to the expansion of Flubetech, S.L., both nationally and internationally, ensuring the sustainable growth of the company.

Carles Colominas

General Director
